

Flexi-Tape

By **Vista**

LED Flexi-Tape is an eye pleasing, functional solution for a broad range of lighting challenges. Environmentally friendly, energy efficient and easy to install, just peel, stick and power them up. LED Flexi-Tape offers solutions for a variety of applications.

Features:

- 3M Peel & Stick on back of tape
- Highly flexible
- Wide viewing angle
- Cuttable every third LED
- RGB changes colors, fades & flashes
- RoHs compliant
- Custom length rolls available

Benefits:

- Environmentally friendly
- Able to use in almost any application
- Energy efficient
- Rugged & Reliable
- UL approved product
- Custom assembly available

Lighting tomorrow.....Today!

Flexi-Tape

3528 / 5050 Standard

Features:

Available in a variety of solid colors
30 LEDs/M (1 1/4" spacing) or 60 LEDs/M (5/8" spacing)
3M adhesive backing
Can be inserted into FTVL tubing for more versatile mounting
Long life - 20,000 - 50,000 hours
Low power consumption
Long run capability
Custom length available

Benefits:

Commercial Grade
100% in house testing
Looks great - mounts easily
Energy efficient
Low clearance - able to fit in tight spaces
Cost effective
1 year limited warranty
Available in reel or custom assembly lengths

Applications:

Architectural applications
Under cabinet lighting
Back lighting
RV steps and stairs
Countertops
Transit - Floor & Ceiling
Toe kicks & valances

3528 / 5050 Water Resistant

Features:

Water resistant - IP65
Domed shape
30 LEDs/M (1 1/4" spacing) or 60 LEDs/M (5/8" spacing)
3M adhesive backing
High lumen output w/low thermal properties
Highly flexible
Exceeds NFPA lighting regulations

Benefits:

Can be used in damp environments
Available with 3528 LED chip or our Super-Bright 50/50
Wide dispersion of light
Low clearance
Looks great - mounts easily
UV resistant
Efficient installation
Limited 1 year warranty
Available in reel or custom assembly

Applications:

Utility
Emergency
Transit
Compartments
Signs
Limousine

Flexi-Tape

3528 / 5050 Waterproof

Features:

- Waterproof - solid core, IP 68
- Available in a variety of solid colors
- 30 LEDs/M (1 1/4" spacing) or 60 LEDs/M (5/8" spacing)
- Long run capability
- Long life - 20,000 - 50,000 hours
- Low Power Consumption
- Operating voltage - 12V or 24V
- Available in 5 meter rolls (16.4 ft.) or custom lengths available
- Available in Chrome Ultra Channel

Benefits:

- Withstands very wet or exposed outdoors conditions - excluding chlorine
- Available with 3528 LED chip or our Super-Bright 5050 LED chip
- Commercial grade
- Looks great - mounts easily
- 100% in house tested
- UV resistant
- 1 year limited warranty

Applications:

- | | |
|-----------------|-----------------|
| Utility | Automotive |
| Emergency | RV |
| Transit | Outdoor |
| Ladder Lighting | Marine, Pontoon |
| Exterior Marker | Landscape |
| Compartments | Architectural |
| Steps | Walkway |

3528 Waterproof Dual Color

Features:

- Flexi-Tape is dual color, three wire construction
- Waterproof - solid core, IP 68
- Available in red/white, blue/white and blue/amber
- 60 LEDs/M (5/8" spacing)
- 50/50 width - 3528 LED chip
- Long life - 20,000 - 50,000 hours
- Low Power Consumption
- Operating voltage - 12V or 24V
- Available in 5 meter rolls (16.4 ft.) or custom lengths available

Benefits:

- Withstands very wet or exposed outdoors conditions - excluding chlorine
- Features Vista's 3528 Flexi-Tape chip
- Control colors - Illuminate both or one for desired effect
- 100% in house tested
- UV resistant
- 1 year limited warranty
- Available in reel or custom assembly lengths
- Available with chrome Ultra Channel

Applications:

- | | | | |
|-----------------|------------|-----------------|-----------------|
| Utility | Automotive | Emergency | RV |
| Transit | Outdoor | Ladder Lighting | Marine, Pontoon |
| Exterior Marker | Landscape | Compartments | Architectural |
| Steps | Marker | Walkway | |

Flexi-Tape

Accessories

Ask about TCB

Vista's own specially designed protective diode package. Protects LED's from voltage spikes created by unstable power from your alternator, static discharge or loose connection. It also protects against reverse polarity, and overpower situations. Design small enough to fit inside end of light or on the wire leads.

Ultra Channel:

Flexi-Tape is available to use with Aluminum Brite Dip Channel with Chrome Tips for a finished look.

Flexi Tape Clip:

Made of polycarbonate with UV inhibitors, Flexi-Tape Clip is available for applications that require a rigid product. Available in lengths up to twelve feet.

Light Dimmer:

Vista's low voltage Light Dimmer makes it possible to dim interior lights to a comfortable level, while saving power and reducing battery drain at the same time. Our energy-efficient, low voltage light dimmer switch handles up to 15 amps. It only draws from the battery the actual amps used, eliminating heat build-up.

End Caps:

Designed for our waterproof Flexi-tape products.

RGB Controller & Remote:

This 4 key RF LED RGB Controller adopts the advanced micro control unit, and is used to control color change, gradual change, strobo-flash and other effects of the RGB LED. It is convenient and simple to use. Comes with remotes and batteries.

Power Supplies:

LED Converter:

Vista recommends the use of LED Converters to power LED lighting applications where power is being stepped down. Voltage spikes and power irregularities that are associated with Electronic Transformers are eliminated with the use of LED Converters.

Available in 10, 25, 60 and 100 Watt models.

Plug-in Transformer:

Vista carries a variety of lighting transformer units capable of transforming 120V. A.C. to 12V or 24V A.C. or D.C.

RGB "Touch Wheel" Controller

The new Color Touch Wheel RGB controller is specially designed for controlling RGB LEDs. The remote is professionally designed with a Touch Color Wheel, which enables easy remote operation with an RF (Radio Frequency) system.

Simply touch the color that you want to display on the color wheel and the RGB LEDs will light up to your specifications.

This Panel 6-key RGB controller adopts the advanced micro-control unit, and is used for controlling a variety of LED light products.

This RGB controller has many advantages such as ease of installation and operation. Choose from several LED light changing patterns and speeds to fit your desired effect.
