Dock Sides Receivers

The Dock Side Receiver is the key component of the Dock Sides System. Locating the receiver under the dock or deck allows placement of the attachments beside it. These locations free up valuable space and reduce clutter. The Dock Sides Receiver is completely out of the way and nearly invisible when the Dock Sides attachments are not in use.

Clamp Receiver With Cross Beam

The Clamp style receiver easily slides onto the bottom rail of truss style docks and is secured in place by tightening two set screws.

Slotted Receiver With Cross Beam

The Slotted style receiver coupled with the cross beam mounting bracket provides a secure mounting solution for solid side rail docks.

Slotted Receiver

The Slotted style receiver mounts to the underside frame of wood and certain metal style docks and decks. It is secured in place by six lag screws for wood frames or six bolts for metal frames.

Dock Sides Accessories

Kayak Racks

Single, Dual and Vertical Kayak Racks offer a convenient method to store up to two kayaks alongside your dock with easy launching and retrieval. Kayaks are securely stored where you want them without sacrificing valuable dock space.

Canoe Racks

The Dock Sides Canoe Rack provides secure and convenient storage for a canoe. The location of the rack offers secure storage for a single canoe. Canoe stores upside down and tie down points in the rack allow it to be secured with straps or cords.

Dock Box Mounts

Dock Box Mount Attachments provides a sturdy mounting platform for easily adding a storage box to your dock without taking up space or blocking movement up and down the dock and finger piers.

Grill Stands and Mounting Bases

Dock Sides Grill Stands and Mounting Bases provide convenient, secure and safe stands for connecting your favorite grill to the dock or deck. A Dock Side Receiver and the Grill Stand place your grill where you want it and near the fun. Dock Sides offers multiple Mounting Base options that allow use of the popular grill brands.

Outdoor Entertainment Center

The Outdoor Entertainment Center provides the perfect compliment for outdoor gatherings on the dock or deck. The entertainment center offers the convenience of cold storage, prep and cutting surfaces along with beverage holders.

Dock Side Bench

The Dock Side Bench provides seating for your dock or deck without taking up valuable surface area.

Dock Side Mounting Base

The Mounting Base provides a sturdy mounting platform for easily adding an umbrella or solar shower to your dock or deck.

All Dock Sides components are available in either a Galvanized or E-Coat/Powder Coated finish. These finishes are designed to provide great looks while resisting the long term effects of sun and weather.

Description	Galvanized	E-Coat/Silver
	Part #	Part #
Clamp Receiver with Cross Beam Includes one clamp receiver with cross beam	86918	86900
Slotted Receiver with Cross Beam Includes one slotted receiver with cross beam	86919	86901
